COMPUTER-INTEGRATED MANUFACTURING SYSTEMS

Index to Volume 1
Numbers 1–4
pages 1–256

1988

Author index

Boaden, R J Justification of computer-integrated manufacturing: some current trends 198
Bourey, J P see **Gentina, J C** Part I 39
Bourey, J P see **Gentina, J C** Part II 103
Bourne, D A Automation and craftsmanship 131
Bowen, J see **O'Grady, P** 204
Brödner, P Options for CIM: 'unmanned factory' versus skill-based manufacturing 67
Cahill, E A Productivity measurement in advanced manufacturing technology 18
Corbett, J M Strategic options for CIM: technology-centred versus human-centred systems design 75
Dale, B G see **Boaden, R J** 198
Gentina, J C Coloured adaptive structured Petri-net: Part I 39
Gentina, J C Coloured adaptive structured Petri-net: Part II 103
Gold, B Some needed changes in US managerial culture and practices to regain international competitiveness 32
Haywood, B The role of computers and humans in integrated manufacturing 89
Kapeliuk, A see **Shtub, A** 211
Kapusta, M see **Gentina, J C** Part I 39
Kapusta, M see **Gentina, J C** Part II 103
Kochhar, A K see **Pegler, H C** 221
Majchrzak, A The human infrastructure impact statement (HIIS): a tool for managing the effective implementation of advanced manufacturing technology 95
Maull, R S see **Tannock, J D T** 228
O'Grady, P Artificial intelligence constraint nets applied to design for economic manufacture and assembly 204
O'Kelly, M E J see **Cahill, E A** 18
Patrick, A CIM for the smaller company 155
Pegler, H C Aspects of a knowledge-based tool for manufacturing systems design 221
Ramers, D see **O'Grady, P** 204
Schultz-Wild, R Transformation conditions of future factory structures: technology, organization, education and vocational training 82
Shtub, A Using DSS methods in selecting operations management software 211
Slack, N Manufacturing systems flexibility – an assessment procedure 25
Smith, G W see **Wang, M** Part I 13
Smith, G W Modelling CIM systems Part II: the generic functions 169
Spiegler, I see **Shtub, A** 211
Tannock, J D T The integrated quality system in CIM 228
Tattersall, A Planning for integration – a data oriented approach 161
Todd, J D Advanced vision systems for computer-integrated manufacture: Part I 143
Todd, J D Advanced vision systems for computer-integrated manufacture: Part II 235
Vail, R L Dynamic integration: some ideas for just-in-time manufacturing 179
Wang, M Modelling CIM systems: Part I methodologies 13
Wang, M see **Smith, G** Part II 169
Warnecke, H-J Computer-integrated manuacture: a production strategy 6
Williams, D H Unix in manufacturing 48
Wright, P K see **Bourne, D A** 131
Zenisek, J Computerized analysis of the design, technology and control of manufacturing systems: experiences of discrete event simulation in Czechoslovakia 110

Title index

Advanced vision systems for computer-integrated manufacture: Part I 143
Advanced vision systems for computer-integrated manufacture: Part II 235
Artificial intelligence constraint nets applied to design for economic manufacture and assembly 204
Aspects of a knowledge-based tool for manufacturing systems design 221
Automation and craftsmanship 131
CIM for the smaller manufacturing company 155
Coloured adaptive structured Petri-net: Part I 39
Coloured adaptive structured Petri-net: Part II 103
Computerized analysis of the design, technology and control of manufacturing systems: experiences of discrete event simulation in Czechoslovakia 110
Computer-integrated manufacture: a production strategy 6

Dynamic integration: some ideas for just-in-time manufacturing 179
Justification of computer-integrated manufacturing: some current trends 198
Manufacturing systems flexibility – an assessment procedure 25
Modelling CIM systems: Part I methodologies 13
Modelling CIM systems Part II: the generic functions 169
Options for CIM: 'unmanned factory' versus skill-based manufacturing 67
Planning for integration – a data oriented approach 161
Productivity measurement in advanced manufacturing technology 18
Some needed changes in US managerial culture and practices to regain international competitiveness 32
Strategic options for CIM: technology-centred versus human-centred systems design 75
The human infrastructure impact statement (HIIS): a tool for managing the effective implementation of advanced manufacturing technology 95
The integrated quality system in CIM 228
The role of computers and humans in integrated manufacturing 89
Transformation conditions of future factory structures: technology, organization, education and vocational training 82
Unix in manufacturing 48
Using DSS methods in selecting operations management software 211

Subject index

Advanced manufacturing technology
– HIIS tool for implementation 95
– productivity measurement 18
Artificial intelligence
– in design for economic manufacture 204
Automation
– and craftsmanship 131
Computer vision
– component recognition 143
– development of vision systems 143
– image analysis 235
– quality assurance 235
Cost justification
– CIM in smaller companies 155
Data model
– for an integrated environment 161
Dataflow
– in smaller companies 155
Education
– for industrial work 82
Factories
– future structures 82
Flexibility
– assessment 25
Flexible manufacturing systems
– attitudes towards FMS 89
– simulation 110
Humans in manufacturing
– human infrastructure impact statement (HIIS) tool 95
– in flexible manufacturing systems 899
– systems design 75
– versus unmanned factory 67
Justification
– cost 155
– of CIM 198
Just-in-time (JIT)
– dynamic integration 179
Knowledge-based systems
– design of manufacturing systems 221
Management
– software 211
– techniques in manufacturing 32
Manufacturing resource planning
– software 211
Measurement
– productivity 18
Methodologies
– Checkland 13
– IDEF0 13
– selecting operations management software 211
Modelling
– CIM systems: generic functions 169
– CIM systems: methodologies 13
– of an integrated quality system 228
Networking
– CIM in smaller companies 155
Petri-net
– control of FMS 39
– pregraph transformation 103
Production
– politics 67
– management 228
–simulation of scheduling and control 110
– strategy 6
Quality control
– integrated systems 228
Training
– for industrial work 82
Unix
– in manufacturing 48
